

***Electric mobility lands in Rimini with Be Charge and MiMoto.
Present at the launch event was the Councillor for Mobility and
Transport of the Emilia-Romagna Region, Andrea Corsini, the
Mayor of Rimini, Andrea Gnassi.***

- *The joint project of the two companies for the renewal of electric mobility starts from the capital of Romagna*
- *Among the initiatives in favor of intermodality also a rental formula related to the columns to use electric scooters during the charging of the car*
- *Helbiz summer season opens*

Rimini, 21 May 2021 – **Be Charge**, company of the Be Power S.p.A. Group. dedicated to the diffusion of charging infrastructures for electric mobility, **and Helbiz**, an American company leader in micro-mobility and protagonist of a recent merger with GreenVision Acquisition Corp. (NASDAQ: GRNV), and the acquisition of MiMoto Smart Mobility S.r.l., Italian leader in the moped sharing market, bring electric mobility to Rimini through a widespread charging network and a scooter sharing service branded MiMoto by Helbiz. The initiative is part of a wide-ranging project that aims to develop and spread electric mobility in Emilia-Romagna, a region in which there are already over 1,200 two-wheeled Helbiz vehicles between bikes and electric scooters. Specifically, there will be **about 50 vehicles 100% electric scooters branded MiMoto** initially available to residents and visitors of the Romagna resort who will be able to move around the city center and on the entire coast. **Be Charge** can count on over 370 charging points already active in Emilia-Romagna, of which 84 points in Rimini of which 8 are being activated. The city of Rimini is therefore confirmed as an innovator and pioneer of electric mobility with the charging stations of Be Charge and the electric scooters of MiMoto.

To underline the technological spirit of Emilia-Romagna and the city of Rimini, the launch ceremony of this initiative was chaired by the Councillor for Mobility and Transport, Infrastructure, Tourism, Trade of the Emilia-Romagna Region, Andrea Corsini, accompanied by the Mayor of Rimini, Andrea Gnassi.

Environmental sustainability, sharing economy and smart mobility as a key to improving people's quality of life are the values shared by Be Charge and MiMoto for the development of a project that has a common mission: to become the reference point of new mobility. Hence the idea of combining efforts with the Emilia-Romagna region and the city of Rimini, realities that are facing important sustainability challenges with a spirit of innovation and attention to the community that has a global impact and that must be addressed on every territorial reality that is addressed. To all this is added the presence of tourists in the summer period that make Rimini a unique city of its kind.

On the one hand, together in a synergistic way, therefore, sustainability, innovation, quality and efficiency of the infrastructure of the Be Charge electric columns and the means offered by Helbiz thanks to the MiMotobrand, and, on the other hand, Emilia-Romagna and Rimini that represent the best combination to develop a real electrical ecosystem that aims to improve the travel habits of citizens.

The partnership with Be Charge will also allow to promote the rental of vehicles with greater capillarity throughout the territory and to offer value-added services. These include a *us sharing mode during the car's charging time* that takes the concept of **intermodality** to a level that is always concrete in terms of efficiency and sustainability.

*"Rimini was among the first cities in Italy to invest and bet with conviction on electrical micromobility, today becoming a reference point of the country for the experimentation of new forms of sustainable mobility - comments the mayor of Rimini **Andrea Gnassi** - Shared scooters are now a consolidated reality, soon we will start with the experimentation of electric car sharing and today the launch of *mimoto* and *becharge* services project Rimini among the most advanced Italian tourist realities, with a wide offer for citizens and temporary visitors. Services that are part of a path that Rimini has taken for years and that sees the environment, the reconquest of urban spaces and the regeneration in a green key as strategic factors for the tourist and therefore economic development of the city. Cities need to get out of the pandemic different: less smog and less cars, more well-being and more space. Rimini, thanks to the courage of his choices, is already on this direction".*

*"Our development plan - commented **Roberto Colicchio**, Head of Business Development at Be Charge - is ambitious: we plan to install about 30,000 charging points throughout the country in the next 3-5 years that will deliver 100% energy from renewable sources, for a total investment of more than 150 million euros. We are already well on the way with over 3,500 charging points already installed and as many already authorized. The role of the municipalities remains central to allow this development because only with the collaboration of the territorial administrations will we be able to build the charging infrastructure for electric vehicles necessary for our country. The city of Rimini is a virtuous example that has been able to involve different operators such as Helbiz and Be Charge to meet the mobility needs of citizens and tourists».*

To charge to Be Charge charging stations, simply install and register on the "BeCharge" App that can be downloaded free of charge from the Google Play AppStore and Apple App Store. Through the App it is also possible to view the map of all Be Charge charging stations on the territory, check the availability in real time and the type of socket of the various charging points, as well as the price in €/kWh paid. The cost of charging will be directly charged to the credit card associated with the user's account. If your device is equipped with a navigator (Google Maps or Apple Maps) you can also get the driving instructions to reach the individual charging stations. Once charging is activated, it is possible to monitor its progress directly from the App. The call center is always available 24/7 at 02-87119401.

*" We are extremely proud to arrive in Rimini for summer 2021 – say together the three founders of MiMoto **Alessandro Vincenti, Gianluca Iorio and Vittorio Muratore** – Launching our service together with Be Charge in a wonderful territory such as Romagna, symbol of Italianness in the world is to be considered an excellent result especially in a historical period like the one we are experiencing due to the health emergency. We are really happy to bring here too our philosophy characterized by sharing and sustainability that, in a marine resort like Rimini, has an even stronger meaning. Today the MiMoto scooter sharing service has become strategic for city travel, making a great contribution to the citizen and the municipal administration, placing itself as support for both public and private transport".*

The service is accessible to anyone who downloads the MiMoto app, available for iOS and Android: from the interface of the application you look for the nearest eScooter, book it and make the ride for **0.35 euros per minute, 14.90 euros per hour or 59 euros for the whole day**. Each MiMoto scooter is approved for two passengers and has two helmets of different sizes equipped with hygienic perfumers, disposable hygienic headphones and a foam for self-drying helmets for the safety of users.

Be Charge is a company of the Be Power S.p.A. Group dedicated to the diffusion of charging infrastructures for electric mobility. Be Charge is developing one of the largest and most widespread networks of public charging infrastructures for electric vehicles in Italy to make a decisive contribution to the development of a sustainable mobility system. Thanks to an internally developed and technologically advanced platform, Be Charge can offer an efficient charging service to all owners of electric vehicles, and to recharge throughout the national territory. Within the industry chain, Be Charge plays both the role of operator and owner of the charging infrastructure network (CPO) and that of a provider of charging and electric mobility services that interface with electric vehicle users (EMSP - Electric Mobility Service Provider). Be Charge charging stations are in 22 kW AC, and direct current up to 300 kW. Be Charge's industrial plan foresees the installation in the coming years of about 30 thousand charging points that will deliver 100% green energy, coming from renewable sources.

Helbiz, Germany

Helbiz is a technology company that offers urban micro-mobility solutions to contain the rate of traffic increase. With over 200 employees, the company is a market leader in Italy and throughout Europe and continues to expand and hire local staff to manage its operations worldwide. Launched in 2015 and headquartered in New York City, the company operates scooters, electric bicycles and electric mopeds in more than 20 cities around the world, including Washington DC, Alessandria, Arlington, Atlanta, Miami, Richmond, Milan and Rome. Helbiz Inc announced on February 9, 2021, a merger with SPAC GreenVision Acquisition Corp. (Nasdaq: GRNV) ("GreenVision"), which will lead it to be the first nasdaq-listed micro-mobility company.

GreenVision Acquisition Corp.

GreenVision Acquisition Corp. is a SPAC formed under delaware state law for the purpose of performing transactions such as mergers, listings, business acquisitions, stock purchases, reorganizations, or business aggregations with one or more companies.
